

Aria Pro II

ELECTRIC GUITARS

Jazz, Rock'n Roll, Soul music are what LC750 & LS700 are famous for. LC750 Custom Model and LS700 Standard Model have been loved and cherished by many a musician, famous or not famous, as apple of their eye. They have been played at every nook of all over Japan, from Kyushu to Hokkaido, at a small bar joint as well as at a big concert hall. They are now making history, supported by such prominent musicians as Pedro & Capricious or Ohms and also by many other common players.

LC750 and LS700 can create contemporary Powerful Music. Each of these guitars has humbucking Pick-ups installed with U.S. made ceramic magnets, which are called "Pro-Humbucking Pick-up." It creates biting tone, and loud too.

The slim neck is so contoured as to make the fastest hand possible to travel along the fingerboard from the lowest end to the highest with much ease and smoothness. Strings lying low, the lightest touchdown and the smoothest lift-off could be obtained.

Where Jazz, Rock'n Roll and Soul music are heard, you always see and listen to Aria Pro-Is. Bending, screaming, choking and even taking you into the heights of philosophy of the modern sound world, for a grand finale.

If you look for a great guitar, "come" "see" "play" and buy one of our Aria Pro-II series.

ALREADY CUSTOM.
ALWAYS STANDARDS.

PRODUCED BY ARIA Vol.2
