

PICKUPS

The CT-CT Guitar comes equipped with Aria's specially designed CS-2 and CH-2 pickups. When compared to other conventional single coil and humbucking pickups there is a very noticeable difference in that the CH-2 and CS-2 have a remarkable reduction in undesirable induction coil noise. This noise factor is very crucial at higher volume levels, where these pickups deliver outstanding performance.

CARVED TOP

The carved top of the CT-CT3, and CT-CT2 guitars were designed with overall playability and looks in mind. In producing this design, Aria has taken into consideration the musician's tactile and visual needs.

TRS-101 TREMOLO

The new TRS-101 Tremolo System has many innovations, resulting in easier string changing, fewer broken

strings, and greater stability during prolonged use. Tuning and intonation problems have been eliminated, allowing the player to "Dive Bomb" with confidence. The TRS-101, fitted into the CT model guitars, make an extremely reliable axe for any style or level of playing.

The ACT-2X Tremolo unit is a simple, reliable design that affords smooth, easy arm movements with
