FEATURES

TRIANGLE-X STRUCTURE (TX series) Triangle-X — Super body structure. Product in pursuit of super sound to create music for the new era. One piece neck and body. Precision carved by the numerical control routers. Concentrates the bridge and tailpiece, pickups, etc. — most important factors for transmitting the vibration to the body — on the triangle zone. Creates surprising long sustain, flexible bass and mid-range, and sharp treble and versatile Triangle Sound. Another big feature of this series is the super balanced body offering the superior playability through the unique original design.

SUPER DETACHABLE (ZF series, TXB series) Tokai Original Super Detachable Neck System. Unchallenged. This system turns down all the existing ordinary detachable neck joint conception. Perfectly solved all the past problems such as difficulty at high position and clumsy mounting — the two biggest disadvantages of the conventional detachable neck system. Promises superb playability and perfect feel at the joint. Secures the neck onto the body with the 5 mm thick brass nuts. Produces miraculous long sustain.

BRASS BRIDGE and TREMOLO UNIT (ZF series, VS series) Tremolo unit mounted on the brass bridge produces superb long sustain. Extreme care is taken in the setting, especially with the ZF and VS series models. Hold tune and create not only tricky arming sound but also very exciting expressive vibrato at your will. Proud of superior durability by adopting a very special alloy tremolo unit and tremolo arm.
