

The original TALBO guitar, employing new materials never before used, is a new sound concept that has definitely advanced the electric guitar world a step further. The brand new materials used in the body effect a revolutionary sound unobtainable from the previous traditional models.

Advanced technology is leading the electric guitar world into a new dimension. All functions playing an important role, including, of course, the bridge and tailpiece which carry the string vibrations to the body, are ideal, original TOKAI designs.

The excellent playability of this series, resulting from the unique, original design of the superbalanced body, is of special appeal.
